National Oceanic and Atmospheric Administration

50 CFR Part 679

[Docket No. 220223-0054]

RTID 0648-XC364

Fisheries of the Exclusive Economic Zone Off Alaska; Reallocation of Pacific Cod in the Bering Sea and Aleutian Islands Management Area

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; reallocation.

SUMMARY: NMFS is reallocating the projected unused amount of Pacific cod from trawl catcher vessels to catcher vessels greater than or equal to 60 feet (18.3 meters (m)) length overall (LOA) using pot gear and to catcher vessels less than 60 feet (18.3 m) LOA using hook-and-line or pot gear in the Bering Sea and Aleutian Islands management area (BSAI). This action is necessary to allow the 2022 total allowable catch (TAC) of Pacific cod to be harvested.

DATES: Effective [*insert date of filing for public inspection at the Office of the Federal Register*], through 2400 hours, Alaska local time (A.l.t.), December 31, 2022.

FOR FURTHER INFORMATION CONTACT: Krista Milani, 907-581-2062.

SUPPLEMENTARY INFORMATION: NMFS manages the groundfish fishery in the BSAI according to the Fishery Management Plan for Groundfish of the Bering Sea and Aleutian Islands Management Area (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson-Stevens Fishery Conservation and Management Act. Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR part 600 and 50 CFR part 679.

The 2022 Pacific cod TAC specified for trawl catcher vessels in the BSAI is 28,855 metric tons (mt) as established by the final 2022 and 2023 harvest specifications for groundfish in the BSAI (87 FR 11626, March 2, 2022) and reallocation (87 FR 51004, August 19, 2022).

The 2022 Pacific cod TAC specified for catcher vessels greater than or equal to 60 feet (18.3 m) LOA using pot gear in the BSAI is 11,216 mt as established by the final 2022 and 2023 harvest specifications for groundfish in the BSAI (87 FR 11626, March 2, 2022).

The 2022 Pacific cod TAC allocated to catcher vessels less than 60 feet (18.3 m) LOA using hook-and-line or pot gear in the BSAI is 5,518 mt as established by final 2022 and 2023 harvest specifications for groundfish in the BSAI (87 FR 11626, March 2, 2022) and reallocations (87 FR 18289, March 30, 2022; 87 FR 51004, August 19, 2022).

The Administrator, Alaska Region, NMFS, (Regional Administrator) has determined that trawl catcher vessels will not be able to harvest 1,000 mt of the 2022 Pacific cod TAC allocated to those vessels under § 679.20(a)(7)(ii)(A)(9).

Therefore, in accordance with § 679.20(a)(7)(iii)(A), NMFS apportions 800 mt of Pacific cod from trawl catcher vessels to the annual amount specified for catcher vessels greater than or equal to 60 feet (18.3 m) LOA using pot gear, and 200 mt of Pacific cod from trawl catcher vessels to the annual amount specified for catcher vessels less than 60 feet (18.3 m) LOA using hook-and-line or pot gear.

The harvest specifications for 2022 Pacific cod included in final 2022 and 2023 harvest specifications for groundfish in the BSAI (87 FR 11626, March 2, 2022) and reallocations (87 FR 18289, March 30, 2022; 87 FR 51004, August 19, 2022) is revised as follows: 27,855 mt to trawl catcher vessels, 12,016 mt to catcher vessels greater than or equal to 60 feet (18.3 m) LOA using pot gear, and 5,718 mt to catcher vessels less than 60 feet (18.3 m) LOA using hook-and-line or pot gear.

Classification

NMFS issues this action pursuant to section 305(d) of the Magnuson-Stevens Act. This action is required by 50 CFR part 679, which was issued pursuant to section 304(b), and is exempt from review under Executive Order 12866.

Pursuant to 5 U.S.C. 553(b)(B), there is good cause to waive prior notice and an opportunity for public comment on this action, as notice and comment would be impracticable and contrary to the public interest. This requirement is impracticable and contrary to the public interest as it would prevent NMFS from responding to the most recent fisheries data in a timely fashion and would allow for harvests that exceed the originally specified apportionment of the Pacific cod TAC. NMFS was unable to publish a notice providing time for public comment because the most recent, relevant data only became available as of September 28, 2022.

The Assistant Administrator for Fisheries, NOAA also finds good cause to waive the 30-day delay in the effective date of this action under 5 U.S.C. 553(d)(3). This finding is based upon the reasons provided above for waiver of prior notice and opportunity for public comment.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: September 29, 2022

Jennifer M. Wallace,
Acting Director, Office of Sustainable Fisheries,
National Marine Fisheries Service.
